Sunday	ET Reopens 8 p.m. GMT Reopens Mon 1 a.m. BST Reopens Mon 1 a.m.	-	-	-	CLOSED until 8 p.m. ET

Engine: Weekend dead zone = Fri 8 p.m. ET to Sun 8 p.m. ET (normally Sat 1 a.m. to Mon 1 a.m. London). Heavy polling OFF, momentum OFF, episodes paused, research/push evaluation OFF. Holidays and early closes override.

Timezone note: ET is canonical. GMT/BST values are normal-season London conversions. During the short US/UK DST mismatch, London is only 4 hours ahead of New York. Code must use America/New_York and Europe/London, never a fixed +5 offset.

TRIGGER - Forex Spot Weekly Session Cheat Sheet

24x5 baseline (e.g. Cboe FX): Sunday 5 p.m. ET through Friday 5 p.m. ET. Exact provider/venue rules remain symbol-specific. Popup probe: EURUSD=X.

Engine: Calendar OPEN + stale Yahoo timestamp = DATA_STALE, not MARKET_CLOSED. Keep a lightweight retry; do not shut the whole FX class from one stale probe.

Timezone note: ET is canonical. GMT/BST values are normal-season London conversions. During the short US/UK DST mismatch, London is only 4 hours ahead of New York. Code must use America/New_York and Europe/London, never a fixed +5 offset.

Engine: Stale BTC-USD on a weekend is a feed/freshness issue, not a market closure. Use DATA_STALE / DATA_UNAVAILABLE and pause calculations until fresh data returns.

Timezone note: ET is canonical. GMT/BST values are normal-season London conversions. During the short US/UK DST mismatch, London is only 4 hours ahead of New York. Code must use America/New_York and Europe/London, never a fixed +5 offset.

Engine: 5-6 p.m. ET is MAINTENANCE, not weekend CLOSED. Heavy polling/momentum OFF; wake at 6 p.m. ET and verify a fresh quote. Maintenance time does not count inside momentum windows.

Timezone note: ET is canonical. GMT/BST values are normal-season London conversions. During the short US/UK DST mismatch, London is only 4 hours ahead of New York. Code must use America/New_York and Europe/London, never a fixed +5 offset.

TRIGGER - US Cash Indices Weekly Session Cheat Sheet

Cash indices such as ^GSPC are not index futures. Treat the cash index as a regular-hours calculation. ES=F / NQ=F use the next page.

Engine: Do not infer index futures from ^GSPC. Cash index CLOSED + ES=F OPEN is valid. Dashboard 'Indices' may show MIXED.

Timezone note: ET is canonical. GMT/BST values are normal-season London conversions. During the short US/UK DST mismatch, London is only 4 hours ahead of New York. Code must use America/New_York and Europe/London, never a fixed +5 offset.

Engine: For the dashboard, probe ES=F/NQ=F separately from ^GSPC. Futures fresh + cash index closed = MIXED / Futures Live, Cash Closed.
